

Press Release

IDnow and DERMALOG cooperate on secure identification

Munich-based company IDnow works with DERMALOG to expand internationally into the growing market for digital identification solutions. Germany's largest biometric company supports IDnow in product development and distribution of Autoldent, an innovative technique for secure and efficient identification in the digital economy.

Munich/Hamburg, January 31, 2019 – Autoldent provides fast and fully automated identification on mobile devices. DERMALOG's advanced face recognition is an integral part of the solution. For identity verification, users only have to make a "selfie" with their smartphone to compare it to their ID. The system's 3D face recognition protects against fraud attempts, such as presentation attacks. With this integrated live detection, Autoldent ensures an outstanding level of security. The solution is highly convenient because it does not require additional data verification. The user does not have to call or visit any provider's branch. Companies using Autoldent need significantly less personnel than with existing authentication solutions and benefit from an identification process that is available 24/7.

"Biometric identification methods that are already established in the public sector can also be of interest to private companies," explains Frank Kretschmer, responsible for business development at DERMALOG. "With Autoldent, we are offering our national and international customers a turnkey solution that meets the current economic challenges."

Autoldent provides fast and fully automated identification on mobile devices.

"To be sustainable, digital identification processes require technologies including the highest security standards. We very much appreciate having a partnership with DERMALOG, a leading international company. We look forward to growing together in the future and further developing our pioneering technologies," says Mario Böhm, Manager Channel Sales at IDnow.

About DERMALOG:

DERMALOG Identification Systems GmbH with head offices in Hamburg is Germany's pioneer for biometry and the largest German manufacturer of biometric devices and systems. One of the shareholders in DERMALOG is the state-owned German Bundesdruckerei.

DERMALOG employs a team of scientists who continuously develop biometric identification systems (so-called "AFIS" and "ABIS" systems), including cutting-edge fingerprint scanning devices. The product portfolio is complemented by biometric border control systems, biometric ID cards and passports as well as biometric voting systems. 'FingerLogin', 'FingerPayment' and 'FingerBanking' are also solutions developed by DERMALOG, as are systems for automatic face and iris recognition.

As well as Germany and Europe, the main markets of DERMALOG are in Asia, Africa, Latin America, and the Middle East. To date, the company has provided its technologies and solutions to more than 220 large-scale installations in 85 countries.

Also, DERMALOG offers biometric solutions for banks and the manufacturers of automated teller machines. This includes the largest biometric banking project worldwide (USD 50 million), which was delivered by DERMALOG (the so-called "BVN Project"): 23 banks and the Central Bank of Nigeria were provided with DERMALOG's ABIS, which prevents double identities among bank customers by means of finger and face recognition and guarantees the best possible biometric identification of customers (KYC) for these banks. Furthermore, many ATMs across the globe have been equipped with DERMALOG's fingerprint technology.
