

DERMALOG

Virtual ID

Transforming identity for the digital age.

Outstanding Features

- > Accurate identification
- > Maximum data protection
- > Significant cost reduction
- > Enhanced convenience
- > Minimized data redundancy

DERMALOG Virtual ID – Welcome to the new age of identification

DERMALOG's Virtual ID combines digital identification and biometric protection in one solution that provides the next generation of identity services.

Virtual ID allows the use of mobile devices like smartphones or tablets as secure and accurate identity proof. Biometric features such as face or fingerprint are used to verify and confirm a user's identity. With Virtual ID, documents like identity cards, passports, driver's licenses or debit cards are no longer required.

The DERMALOG solution not only enhances user convenience but also benefits providers by reducing the cost and expense of complex registration and verification processes. Virtual ID offers both public institutions and private companies with entirely new ways to interact with citizens and customers.

Benefits

Accurate identification

Virtual ID checks biometric features for unique identification.

Maximum data protection

Virtual ID ensures full encryption for any system-related data transfers.

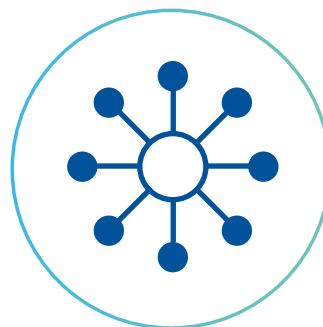

Significant cost reduction

Virtual ID reduces the effort of identity checks and management.

Enhanced convenience

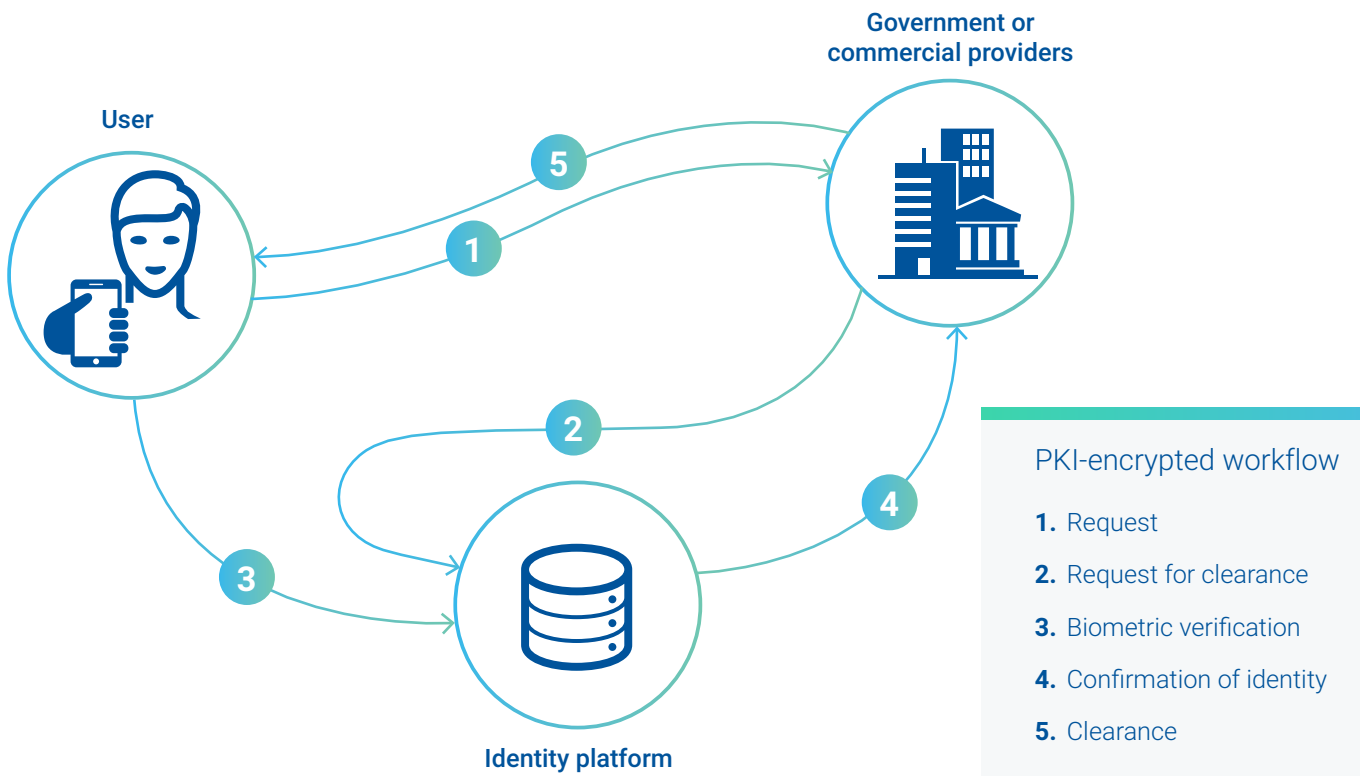

Virtual ID simplifies identity management for providers and users.

Data consolidation

Virtual ID facilitates data management and minimizes data redundancy.

Cardless access to any trusted service

Fields of use

Banking

Automotive

Aviation

Insurance

E-government

many more
