

Press Release

DERMALOG shows award-winning multi-biometrics at Trustech 2017.

Multimodal biometrics – the combination of multiple biometric characteristics – makes identification procedures even more reliable. At the Trustech trade fair in Cannes, DERMALOG will demonstrate the benefits of the next level of secure identification.

Cannes, France, November 24 - Biometrics plays an increasingly important role in our everyday lives. For example, more and more people are using their fingers or their faces to unlock their own cell phones. This is not only safer, but also much faster and more comfortable than entering a PIN. In order to improve the reliability of biometric recognition, it has become possible to combine several features such as fingerprints, facial geometry and iris texture. The so-called multimodal biometrics has become one of the most important trends in person identification.

DERMALOG, Germany's leading provider of biometric solutions, will show the latest technology in multi-biometrics at this year's Trustech in Cannes. The Hamburg-based company has developed an Automated Biometric Identification System (ABIS) that simultaneously compares finger, face and eye data for maximum accuracy.

DERMALOG just received the German Business Award 2017 in the category "Most Advanced Identification Software" for its ABIS. Günther Mull, CEO of DERMALOG, said, "Multi-biometrics, the combination of two or more biometric characteristics, is currently on the rise. With its ABIS, DERMALOG positions itself as an innovation leader and offers the next level of secure identification." The company's system is already in use around the world, in banking and border control as well as in issuing official documents such as passports and driver's licenses.

DERMALOG's Automated Biometric Identification System (ABIS) enables the combination of various biometric characteristics, making identity fraud more difficult.

DERMALOG will be exhibiting at Trustech 2017 on the "Riviera" level, booth L 020. For further information regarding the company's innovative products and solutions visit www.dermalog.com.

About DERMALOG:

DERMALOG Identification Systems GmbH with head offices in Hamburg is Germany's pioneer for biometry and the largest German manufacturer of biometric devices and systems. One of the shareholders in DERMALOG is the state-owned German "Bundesdruckerei".

DERMALOG employs a team of scientists who continuously develop biometric identification systems (so-called "AFIS" and "ABIS" systems), including cutting-edge fingerprint scanning devices. The product portfolio is complemented by Biometric Border Control Systems and Biometric ID cards and passports as well as Biometric Voting Systems. "FingerLogin", "Finger- Payment" and "FingerBanking" are also solutions developed by DERMALOG, as are systems for automatic Face and Iris recognition.

As well as Germany and Europe, the main markets of DERMALOG are in Asia, Africa, Latin America and the Middle East. To date, the company has provided its technologies and solutions to more than 200 large scale installations in more than 80 countries.

In addition, DERMALOG offers biometric solutions for banks and for the manufacturers of Automatic Teller Machines. This includes the largest biometric banking project world-wide (USD 50 million), which was delivered by DERMALOG (the so-called "BVN Project"): 23 banks and the Central Bank of Nigeria were provided with DERMALOGs ABIS, which prevents double identities among bank customers by means of finger and face recognition and guarantees the best-possible biometric identification of customers (KYC) for these banks. Furthermore, many ATMs across the globe have been equipped with DERMALOG's fingerprint technology.
