

DERMALOG

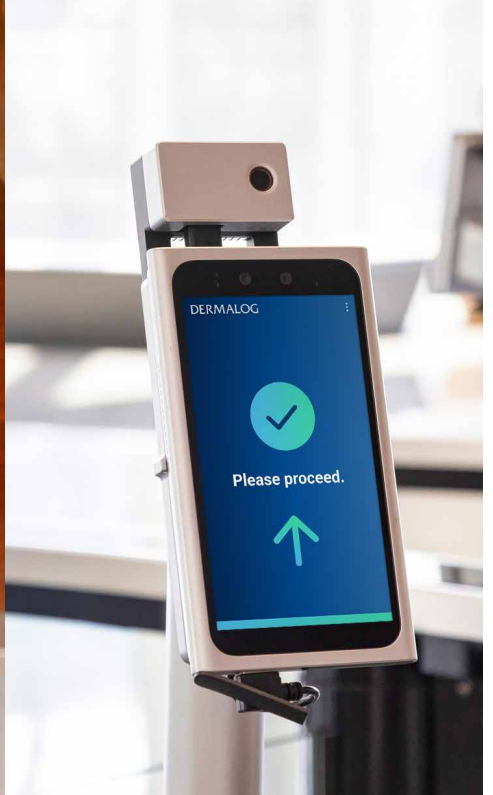

Biometric Access Control

Improving security and convenience

Key Benefits

- > Accurate identification
- > Maximum security
- > High-speed processing
- > High-level spoof protection
- > Enhanced convenience
- > Easy to integrate

Protecting Businesses with State-Of-The-Art Biometric Technology

Enterprise security faces significant challenges as today, companies of all sizes require comprehensive physical and digital protection due to increasing threats. DERMALOG Biometric Access Control provides an outstanding level of security and seamless access to restricted areas and facilities.

Access control systems significantly contribute to corporate security at large enterprises as well as SMEs. Biometric Access Control by DERMALOG provides high-level protection and excellent ease of use by enabling fully contactless access authorization verification. DERMALOG's high-speed, accurate and well-proven biometrics technology allows reliable identification based on artificial intelligence, for example, via face or fingerprint. Biometric Access Control also includes DERMALOG's embedded liveness detection, effectively detecting fraud attempts, for example, by photo

presentation or masks. In addition to biometric features, the system can read and process numerous credentials, such as contactless cards, QR codes and mobile wallets, providing multi-factor authentication. Furthermore, the solution operates stand-alone while integrating easily with existing infrastructures and offers additional features such as time and attendance tracking. With Biometric Access Control, DERMALOG has developed a comprehensive solution that enhances physical and digital security and makes access to restrictive environments or facilities much more convenient.

Secure Access via

Face

Fingerprint

Iris

Card

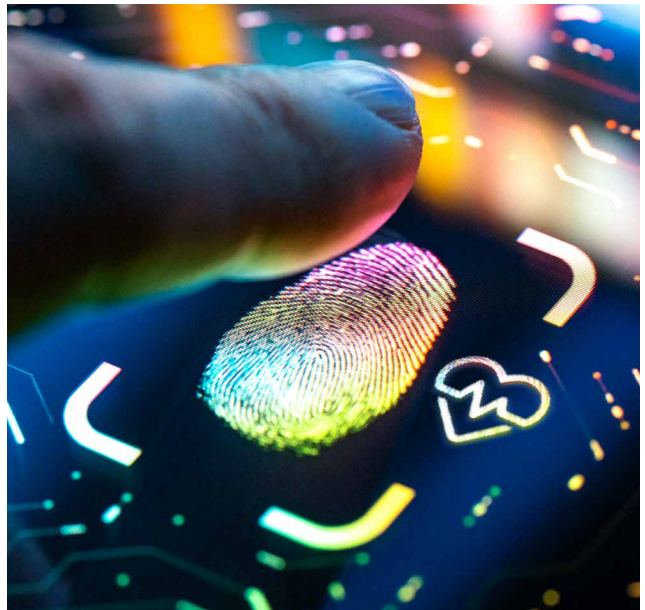

Mobile Device

QR Code

Certified **Liveness Detection** to Prevent Spoofing

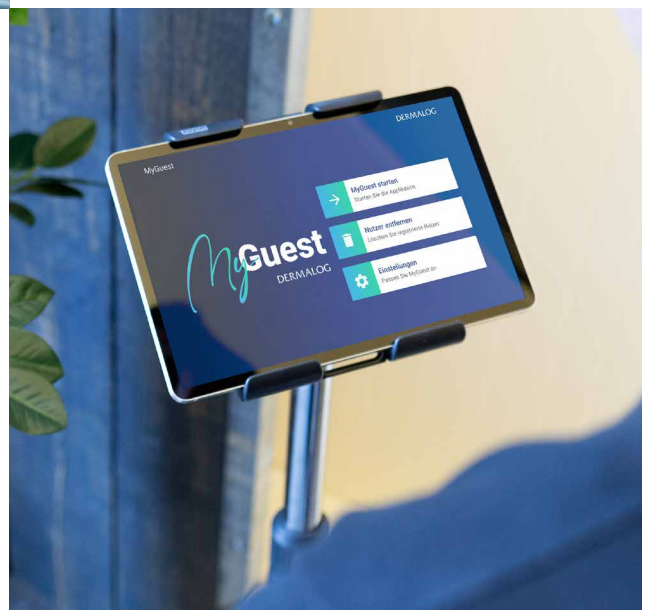

Key Features

- > Secure access via biometrics
- > Liveness detection
- > Full data encryption
- > Multi-factor authentication
- > Visitor management
- > Time and attendance management
- > Multi-platform solution

Key Benefits

- > Accurate identification
- > Maximum security
- > High-speed processing
- > High-level spoof protection
- > Enhanced convenience
- > Easy to integrate
