

Contactless Fingerprint Check

Contactless biometric identification has become even more critical in the context of the current pandemic. With Contactless Fingerprint Check, DERMALOG introduces highly accurate and remote fingerprint recognition for smartphones.

All it takes is a photo of one or more fingers to perform a fast and reliable 1:1 or 1:N matching. As a result, expensive investments and inconvenient handling of additional hardware are no longer necessary. DERMALOG Contactless Fingerprint Check combines secure identification with mobile devices' ease of use and flexibility.

DERMALOG Contactless Fingerprint Check Features

- » Contactless biometric identification
- » Accurate fingerprint capture via smartphone
- » Fast capture of one or more fingers (4-4-2)
- » 1:1 and 1:N matching included
- » Convenient user guidance via app
- » Available for all major mobile operating systems

About DERMALOG

Inspired by the potential of biometrics, DERMALOG has been developing solutions for public authorities, companies and financial service providers for more than 25 years. Today, the company, headquartered in Hamburg, Germany, is one of the country's largest manufacturers of identification systems, with over 250 large-scale installations in more than 100 countries. DERMALOG also provides hardware and software for multi-biometric systems combining different biometric features such as face and fingerprints.
